

CSS and Color

PEER GRADING WARNING

Peer grading means others will be looking at your work. For this entire semester you should keep everything in your web pages G rated. If you offend someone with your words or with images and they report it to me, I will have no option but to relay the complaint to the appropriate department for evaluation. Jokes are fun but offending someone is not. So, to be safe, don't do anything that could possibly be taken the wrong way and get you into serious trouble.

Copy the exercise3.html file in your exercises folder and rename the copy to exercise8.html. (Exercise 3 was the personal web page from exercise 1 plus lists, links, and images that were added in exercise 3. If you didn't do exercise 3, well, there's no time like the present.)

Create a directory named styles in your www directory. Inside of styles, create an external stylesheet named exercise8.css and link it to the exercise8.html page with the following styling:

ALL OF THE STYLES FOR THIS ASSIGNMENT MUST BE DEFINED IN THE exercise8.css FILE.

- Add a link in exercises8.html to the file exercises8.css in the styles directory.

IF YOU DO NOT LINK THIS FILE CORRECTLY YOU WILL RECEIVE ZERO FOR THIS ASSIGNMENT. ASK IF YOU HAVE ANY ISSUE.

At this point your directory should look something like this. All your exercises in the exercises directory should be linked on your index.html page.

```
www
├── index.html
├── exercises
│   ├── exercise2.html
│   ├── exercise4.html
│   ├── exercise5.html
│   └── exercise8.html
├── images
│   └── me.png
└── styles
    └── exercise8.css
```

- Give the document a light gray background (**use a color name** of your choosing).
- Make the background of h1 elements black and the font color white. **Use rgb colors.**
- Make p tags background color slightly darker than the background by using rgba colors.
 - As you do this, experiment with several different alpha values. Add a horizontal rule followed by bullet list at the end of the document listing the different alpha values you tried and describe the visual effect you saw.
 - Add styling for this new bullet list so that the list items have a muted blue background; **however, this should NOT affect other lists on the page.**

Muted = less bright, more pale version of a color by adding white (tinted) or black(shaded)

Muted Colors		
BLUE	Tinted	Shaded

- Make the h2 elements a muted green shade and let the font color be the same as the document background. **Use rgb colors.**
- Let the blockquote element font color be a muted magenta. **Use rgb colors.**
- Choose a “goldish” background for the Fett numbered list. **Do this by adding the class name “fetts” to the ol element and styling the fetts class. Use rgb colors.**
- At the bottom of the previous work, add a horizontal rule plus the following:
 - A definition list with the following terms defined:
hue, saturation, brightness, opacity, contrast, lightness, alpha transparency.
 - Make dt elements a soft shade of green using hsl or hsla.
 - Make the dd elements a soft cyan shade using hsl or hsla.

Upload your exercise8.html and your exercise8.css file to the workshop. DO NOT CHANGE ANY RELATIVE LINKS.
